

4 Benefits of Hearing Aids

Hearing aids provide a number of proven benefits

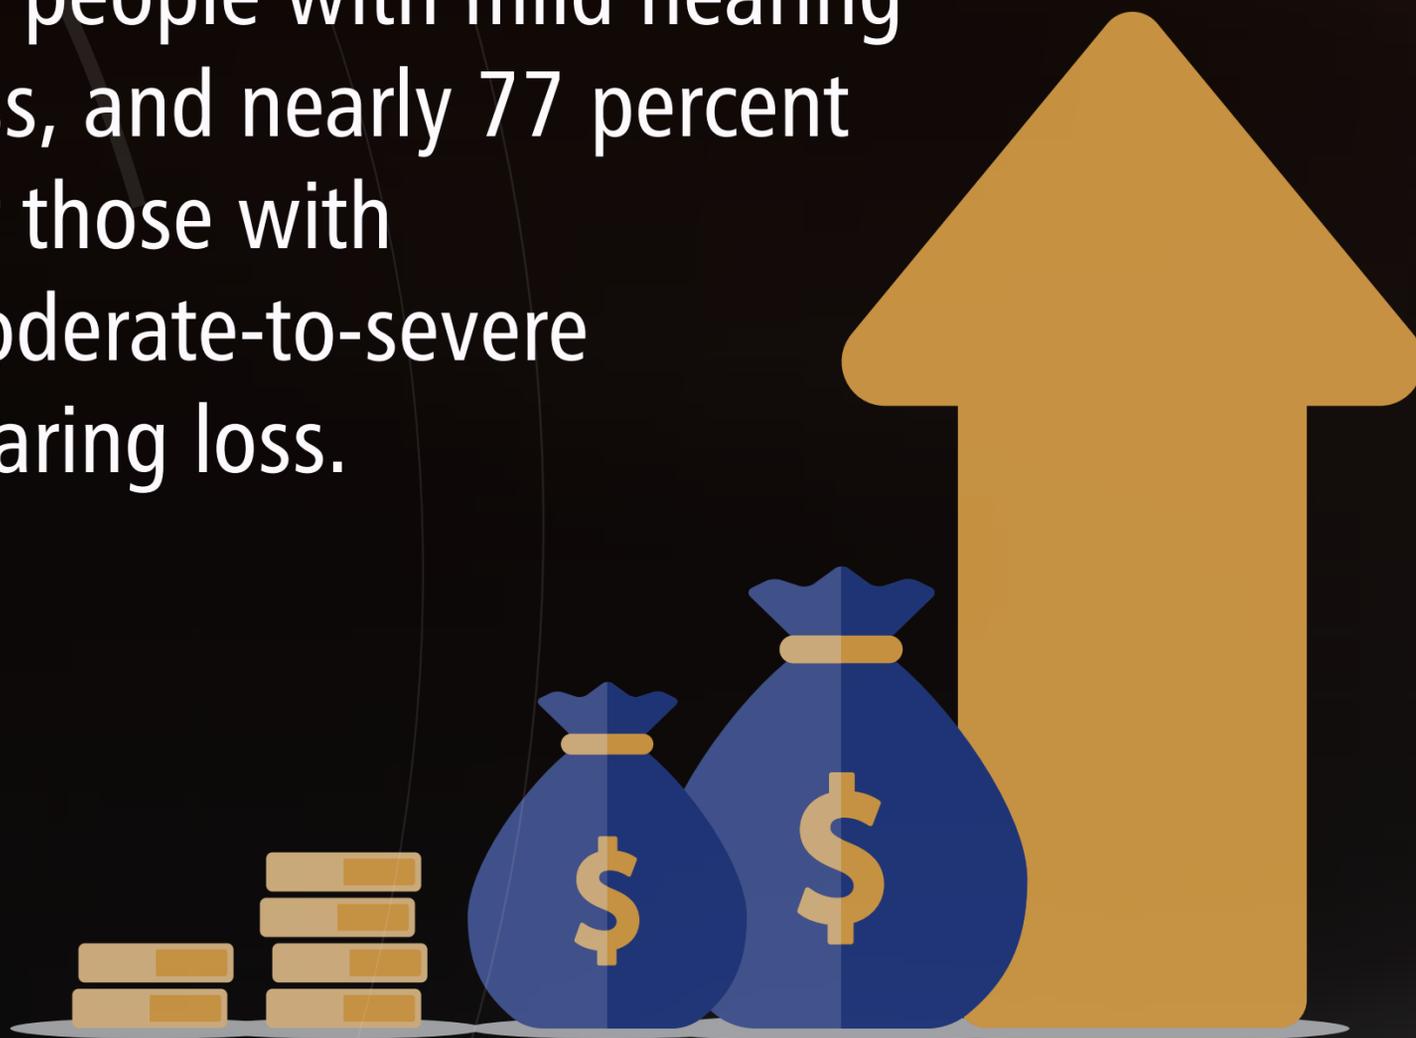

Increased Earning Power:

Research by Better Hearing Institute found that correcting hearing loss can increase the chance of earning by over 90 percent for people with mild hearing loss, and nearly 77 percent for those with moderate-to-severe hearing loss.

ing fork

Ear Canal

Slow Cognitive Decline

Researchers have found that hearing aids help decrease atrophy while increasing hearing ability.

Reduce Annoyance Related to Tinnitus

Hearing Aids with multiflex tinnitus masker feature can enable your audiologist to deliver best suited channel specific masking noise to help you overcome the annoyance caused by tinnitus

Better Living

Research at Better Hearing Institute has found that people who wear hearing aids enjoy a better life than those who let it go untreated.
