# EVERY MOVE MAKES A DIFFERENCE

Hearing can go from easy to nearly impossible in a matter of seconds as we move from one place to another. Most of our daily activities involve motion and we carry conversations with us as we go.

At Signia, our vision is to enable hearing aid wearers to experience the same excellent level of hearing wherever they go. So they can be fully involved in life. To achieve this goal, hearing aids need to understand the situation the wearers are in, how they interact, and how they move to identify which sounds are important.

# CREATING THE **MOST PERSONALIZED** SOUND EXPERIENCE

Our new Signia Xperience platform uses the most advanced technology and information to analyze and understand every wearers environment, hearing situation and hearing preference. This allows for the most intelligent hearing aids that scan and process the soundscape with complete spatial accuracy, delivering sound thats clear and detailed even in the noisiest situations.

## HEARING WHAT MATTERS: **THE NEW SIGNIA XPERIENCE.**

All existing hearing aids choose between hearing what is directly in front of the wearer or hearing their general surroundings. Signia Xperience is the first hearing aid platform ever that doesnt make that compromise. It can do both at the same time. This allows the wearer to understand speech from any direction and in any situation even when they are moving.

# GIVING HEARING AIDS A NEW SENSE

Everyone is different. And everyone has a unique hearing experience, depending on where they are and what they are doing.

Our new Xperience platform with its revolutionary YourSound technology understands each hearing aid wearer and their individual situation.

## A MOVING EXPERIENCE

YourSound delivers superior sound processing driven by our unique acoustic-motion sensors. YourSound measures more aspects of sound than ever before and, for the first time, how your movement affects your hearing in every situation.

By giving the hearing aids this new sense, wearers enjoy a consistently excellent hearing experience as they move from one place to another. More than 90% of Xperience wearers report a natural sound experience while moving. Wearers also show statistically significant improvements in both speech understanding ability and listening effort with speech coming from the side while in motion and stationary, compared to current, premium technology.\*

Satisfaction with Xperience hearing aids in background noise exceeds 90%, which is substantially higher than corresponding values in recent MarkeTrak/EuroTrak surveys. As a result, wearers are more likely to recommend Xperience hearing aids to a friend than comparable devices.\*

## THE WORLDS FIRST ACOUSTIC-MOTION SENSORS

Using powerful acoustic sensors combined with a revolutionary motion sensor linked to sound processing, YourSound technology measures more aspects of sound in real time than ever before, including how the wearers movement affects their hearing.

### Motion sensor

In a worlds first, this is built into the hearing aids to provide crucial information about the wearers movement through his or her acoustic surroundings. Based on this data, the sound processing can be optimized to deliver sound as nature intended, whether running in the park or sitting in a meeting.

### Acoustic sensors

Sound localization, own voice detection, signal-to-noise ratio and much more: By collecting more information and characteristics about the hearing aid wearers acoustic environment than ever before, the soundscape is brought to life far more precisely and in much greater detail.

## MASTERING THE PERFECT PERSONALIZED SOUND

Drawing on the unique acoustic-motion sensors precise input, YourSound adapts to wearers changing personal needs as they move throughout their day. It always understands where they are and what they are doing.

### Dynamic Soundscape Processing

Delivers natural sound and speech in every situation even when moving.

### Own Voice Processing

Optimizes the wearers natural-sounding own voice.

As a result, YourSound predicts and highlights what truly matters to Signia Xperience hearing aid wearers in any given situation.

# HEARING AS INTENDED BY NATURE

# DISCOVER THE NEW SIGNIA XPERIENCE

Your daily goal is to provide your clients with perfect hearing aids for their individual needs. With our new Xperience platform, this goal is easily within reach. The new RICs, Pure 312 X and Pure Charge&Go X combine a truly personalized hearing experience and Bluetooth connectivity with an attractive modern lifestyle design. Their soft rounded form emphasizes slimness and comfort while the new unique metallic colors and finishes reflect the premium quality of these landmark devices.

Along with the rechargeable Pure Charge&Go X comes the Inductive Charger II for easy hearing aid charging overnight.

# THE MOST DISCREET PERSONALIZED HEARING WITH DIRECT STREAMING

**New!**  
Model

## Key features

- Most natural own voice and best speech understanding in noise, even when the wearer is in motion
- Worlds first integrated acoustic-motion sensors
- Long-lasting high quality audio streaming
- Ultra HD e2e and Bluetooth connectivity

- TeleCare
- Remote Control
- Connectivity & Streaming

# SMART LOOKING, SMART CHARGING

## Inductive Charger II

Pure Charge&Go X comes with the Inductive Charger II that features a charger lid to protect the hearing aids. Its smart design also accommodates custom molds. A fast charging option, a drying function via inductive charging, and intuitive left and right LEDs for status information complete this next-generation charger.

The Inductive Charger II is compatible with Pure Charge&Go X, Pure Charge&Go Nx, Motion Charge&Go Nx, Cellion primax.

The charger's lid protects hearing aids while they are charging and makes it a smart carrying case.

# A MORE PERSONAL WORLD FOR ALL

With the new Signia app, you can provide your customers with more direct, more individual support and tailor their hearing aids to their personal requirements.

Providing your clients with all the usability they've come to expect from smartphone apps couldn't be simpler. The new Signia app integrates all the functionalities of the previous apps, including connectivity, remote control and TeleCare into one unified app.

Users can discreetly control their devices while streaming their favorite music and TV programs directly into their ears as well, while TeleCare lets you stay closer to them and provide help, even when they're on the go. Everything in one place for greater convenience and ease of use.

Furthermore, thanks to the Signia app's completely new and modern user interface, your customers will enjoy easy handling and usability.

## FUNCTIONALITY AT A GLANCE

TeleCare

Stay in closer contact with your customers:

- Real-time contact via text message, voice call or video call
- Intuitive monitoring of your customers' daily satisfaction
- Set virtual appointments for the precise remote adjustment of the hearing aids

Remote Control

Personalize your customers' hearing experience further:

- Hearing program and volume control
- Sound Balance Adjustment
- 360° Spatial Configurator for individual adjustment of directionality
- Continuous monitoring of the hearing aids connection and battery status

Connectivity & Streaming

- Easy management of audio streaming accessories (e.g. StreamLine TV, StreamLine Mic) as well as CROS devices
- Volume level control while streaming
- Adaptive streaming volume
