With Phonak Virto™ Marvel we introduce multifunctional hearing aids that deliver a love at first sound experience

Love at first sound ... each and every day!

When we say love at first sound, we don't just mean the first time your clients try Phonak Virto Marvel, but each and every time they wear them. From the moment you first fit them with their Marvel hearing aids, they can expect a **sound quality second to none**.

Key highlights Virto M-312:

- Exceptional sound quality from the first fit¹
- Better speech understanding in noise²
- Reduced listening effort in noise³
- World's first custom hearing aid with classification of streamed audio signals⁴

Key highlights Virto M-NW O:

- Exceptional sound quality from the first fit¹

Customized

Biometric Calibration

Phonak Virto Marvel hearing aids include Biometric Calibration and are precisely calibrated to your clients' individual ear anatomy for better hearing performance. Identifying over 1600 biometric data points, it then calculates the unique calibration settings for each Virto M hearing aid. The calibration settings ensure increased accuracy and precision providing a 2 dB improvement in directionality* compared to Phonak products without Biometric Calibration.⁵

Acoustically Optimized Vent (AOV)

Selecting the appropriate vent size is a careful balance of occlusion, feedback, audibility, and sound quality. AOV is our most popular vent option because it takes into account the size and shape of the clients' hearing aids as well as their audiometric configuration and determines what vent size will minimize feedback and occlusion and maximize hearing performance.

Virto M-Titanium with Titanium FitGuide

Titanium is renowned for its strength and durability. By 3D printing custom shells in this extraordinary material, this is the smallest Phonak custom hearing aid ever. Thanks to the Titanium FitGuide, over 50% of people get an even more discreet fitting Virto M-Titanium by an average of 2.5 mm.⁶ That is the difference between discreet and super discreet.

EasyView Otoblock

Get deeper impressions with the EasyView Otoblock (EVOB). The EVOB attaches directly to a standard otoscope specula. The transparent lens at the end of the EVOB allows for full visualization of the ear canal and eardrum during insertion. On average, ear impressions are 6 mm longer with the EVOB compared to the standard impression protocol.⁷

What makes Virto M-312 even more marvelous?

Phonak Virto M-312 is the world's first custom hearing aid with hands-free calls that directly streams audio content from iOS®, Android™ or other Bluetooth® enabled devices. In addition, audible phone notifications can be set to be heard through the Marvel hearing aids. Marvel also delivers stereo sound quality streaming for music, videos, e-books, podcasts and much more.

Phonak Virto M-312 also features proprietary AirStream™ technology for streaming from any TV and stereo system. Your clients can enjoy TV programs and movies with the Phonak TV Connector, a simple plug and play solution. It's just like using wireless headphones, except maybe even better, because Marvel hearing aids can now distinguish between streamed speech and music signals, and automatically adjust for an optimized sound quality.

Key highlights:

- Connects to smartphones – iOS and Android
- Connects to a variety of everyday electronics
- Hearing aids used like wireless stereo headphones
- Extra-long streaming time thanks to AirStream technology

With RogerDirect™ Phonak Virto M-312 is the one and only custom hearing aid that allows Roger technology to stream directly without an external receiver.

Key highlights:

- Designed to improve speech understanding in noise and over distance
- Discreet and appealing solutions for performance in noise and over distance
- Virto Marvel and Roger are the optimal solution for challenging listening situations

Apps-olutely Marvelous!

Phonak's new digital service platform is dedicated to improve your clients' personal listening needs. Through the myPhonak app, your clients can choose to share information with you, you can customize their listening experience in real-time and with the advanced Remote Control function your clients can adjust their hearing aid settings to their individual needs.

Key highlights:

- Real-time sound adjustment and personalization
- Real-time remote video support
